INSTRUCTIONS: To get your Covid-19 Social Risk Profile **CLICK ON THE ABOVE IMAGE** and answer all the questions about your last 24 hours of activity.

MASKING UP IS STILL IMPORTANT!

COVID-19 is airborne and spread by respiratory droplets which enter through the nose and mouth. Wearing a mask will help prevent the spread of these droplets into the air and reduce the risk of breathing in the virus.

WASH YOUR HANDS!

Frequent and proper hand hygiene is one of the most important measures that can be used to prevent infection with the COVID-19 virus.

SOCIAL DISTANCE

These measures secure physical distance between people (of at least 6 feet), and reduce contact with contaminated surfaces, while encouraging and sustaining virtual social connection within families and communities.
